

# Pooh & Tigger Icons for the Mac

This is my first effort at OS X icons. I'm still figuring out the whole mask thing, but for the most part, these came out pretty well. If anyone has mastered a quick (and easy) way to take an image and turn it into both a mask & image, then please let me know... There has to be something easier than the 20 step process I'm using!

Anyway, this is **free** and all of that. If you want to email me and say, "Hey, thanks." then I'll get warm fuzzies and you'll feel like you did a good deed -- and everyone's happy. If not, that's okay, too.

Peace and love to all in a turbulent time.

Dave Ulrich
